

Statement of Environmental & Sustainability Policy

JP Construction Ltd operates as a Construction / Development business based in Swansea.

The business has a small home office-based focal point and day to day activities involve significant periods of time out on Construction / Client Sites.

JP Construction Ltd seeks excellence in all aspects of its activities, and is committed to minimising the environmental impacts of its activities through the aspects detailed below:

JP Construction Ltd **is committed to ensuring consistent good environmental performance through due diligence and programmes of continual improvement review; it has adopted an integrated approach in its operational activities, aiming to take into consideration the protection of the environment as a whole and employs cost-effective environmental management into all aspects of the organisation's activities. The Company recognises its obligations to reduce or control the effects of its environmental impacts particularly in the areas of efficient use of resources, waste disposal, & energy usage. Furthermore through diligently ensuring compliance with environmental legislation, the Company is committed to monitoring and aspiring to improve its principles of organisational environmental sustainability performance.**

Aims & Commitments:

Resource is provided to ensure that:

Energy is used efficiently and consumption is monitored with an aspiration to reduce the carbon footprint of our activities as applicable. Efficiently utilise resources.

The generation of waste is minimised, with steps taken to recover or recycle where practicable.

Eliminating or reducing environmental impacts that have the potential to offend local communities. The Company is committed to pollution prevention and will comply with all environmental legislation.

Give due consideration and influence where possible environmental issues and energy performance when involved in the planning and design of buildings, including landscape design.

Environmental criteria are taken into account in the specification and procurement of goods and services.

Investigation and assessments are promoted as appropriate to embrace advanced 'engineering and environmental' technologies which are intelligent and relevant.

Seek to use materials and products that use less energy in their manufacture.

Promotion of opportunities to reduce unnecessary travel and consider alternatives.

Improve biodiversity and landscape, and strive to protect amenity.

Staff are trained and continually updated on environmental awareness issues.

Improvement Objectives:

Actively promote considerate and pertinent sustainability and environmental issues in the activities and services we provide to Clients (e.g. SWMP), reduce the significant environmental impacts of our business through realistic target setting, and to undertake a formal review of the effectiveness of this Policy on an annual basis

The policy will be subject to annual review and will be communicated regularly to all staff. It will also be made available to all interested parties, as appropriate.
